Why are Artists Poor? - Hans Abbing - 2002

An unconventional socio-economic analysis of the economic position of the arts and artists

Why are Artists Poor? - Hans Abbing - 2002

An unconventional socio-economic analysis of the economic position of the arts and artists

Metaphor and Mills - Honesto Herrera-Soler - 2012-07-04

While the role of metaphor in economics and business has produced multiple research articles, no comprehensive book-length study has yet appeared. The present book is a timely attempt to fill this gap, giving a global coverage of the role of metaphor in business and economics. It spans time (from Classical Greece to the current business network meeting-room), space (from Europe through the Americas to Asia), cultures and languages (from continental European languages, Brazilian Portuguese to Chinese). The theoretical grounding of the book is the Conceptual Theory of Metaphor taken in a dynamic sense as evolving with on-going research. The theory is thus used, adapted and refined in accordance with the evidence provided. Metaphor is shown to be theory constitutive in the elaboration of economic thinking down through the ages while, at the same time, the emphasis on evidence open to historical, cross-cultural and cross-linguistic considerations align with the current notion of situatedness. The book is a rich source of information for researchers and students in the fields of Metaphor Studies, Economics, Discourse Analysis, and Communication Studies, among others.

Guidelines for Design and Construction of Health Care Facilities - - 2006-01-01

A Cultural Economic Analysis of Craft - Anna Mignosa - 2019-06-11

Are we aware of the values of craft? In this edited volume, cultural economists, researchers and professionals provide an interdisciplinary discussion of the relevance and contribution of the craft sector to the economy, as well as to society at large. Mignosa and Kotipalli bring together contributors to compare the craft sector across countries, analysing the role of institutions, educational bodies, organisations and market structure in its evolution and perception. The Western approach to craft and its subordinate position to the arts is contrasted with the prestige of craftmanship in Eastern countries, while the differing ways that craft has attracted the attention of policy agencies, museums, designers and private institutions across regions is also analysed. This volume is vital reading to those interested in the economic features of craft and craftsmanship around the world, as well as for those interested in the importance of policy in bringing about effective sustainable development.

Galileo's Instruments of Credit - Mario Biagioli - 2007-07-15

In six years, Galileo Galilei went from being a mathematics professor to a star in the court of Florence to a target of the Inquisition. And during that time, Galileo made a series of astronomical discoveries that reshaped the ideas of the physical nature of the heavens and transformed him from a university mathematician into a court philosopher. Galileo's Instruments of Credit proposes radical new interpretations of key episodes of Galileo's career, including his telescopic discoveries of 1610, the dispute over sunspots, and the conflict with the Holy Office over the relationship between Copernicanism and Scripture. Galileo's tactics shifted as rapidly as his circumstances, argues Mario Biagioli, and these changes forced him to respond swiftly to the opportunities and risks posed by unforeseen inventions, other discoveries, and his opponents. Focusing on the aspects of Galileo's scientific life that extended beyond court culture and patronage, Biagioli offers a revisionist account of the different systems of exchanges, communication, and credibility at work in Galileo's career. Galileo's Instruments of Credit will fascinate readers interested in the history of astronomy and the history of science in general.

Archaeology and Economic Development - Paul Burtenshaw - 2017-12-02

"Nowhere in archaeology is the gap between theory and practice more evident than in its ambivalent engagement with economic development. This groundbreaking volume assembles practicing archaeologists, economists, and NGO officials in an extensive exploration of the theoretical, practical and ethical issues raised by archaeologists' use of cultural heritage to support economic development. The first chapters consider the problem of articulating the value of tangible and intangible heritage when economic measures alone are inadequate. Subsequent chapters present regional perspectives on archaeology and development, and present a host of case studies from around the globe that describe archaeologists' development projects, including some that are successful and others that are less so. These studies both suggest best practices in the implementation of development projects and illuminate the obstacles to success created by political conflict and competing human needs. Ethical issues and practical considerations converge in chapters that explore the role that members of local communities should play in the design, management and governance of archaeological and heritage resources. In this volume, archaeologists and heritage professionals will encounter a thought-provoking international discourse concerning the path forward for archaeology as the field engages with economic development."

Surrender - Michael Allen Meeropol - 2017-07-19

Michael Meeropol argues that the ballooning of the federal budget deficit was not a serious problem in the 1980s, nor were the successful recent efforts to get it under control the basis for the prosperous economy of the mid-1990s. In this controversial book, the author provides a close look at what actually happened to the American economy during the years of the "Reagan Revolution" and reveals that the huge deficits had no negative effect on the economy. It was the other policies of the Reagan years--high interest rates to fight inflation, supply-side tax cuts, reductions in regulation, increased advantages for investors and the wealthy, the unraveling of the safety net for the poor--that were unsuccessful in generating more rapid growth and other economic improvements. Meeropol provides compelling evidence of the failure of the U.S. economy between 1990 and 1994 to generate rising incomes for most of the population or improvements in productivity. This caused, first, the electoral repudiation of President Bush in 1992, followed by a repudiation of President Clinton in the 1994 Congressional elections. The Clinton administration made a half-hearted attempt to reverse the Reagan Revolution in economic policy, but ultimately surrendered to the Republican Congressional majority in 1996 when Clinton promised to balance the budget by 2000 and signed the welfare reform bill. The rapid growth of the economy in 1997 caused surprisingly high government revenues, a dramatic fall in the federal budget deficit, and a brief euphoria evident in an almost uncontrollable stock market boom. Finally, Meeropol argues powerfully that the next recession, certain to come before the end of 1999, will turn the predicted path to budget balance and millennial prosperity into a painful joke on the hubris of public policymakers. Accessibly written as a work of recent history and public policy as much as economics, this book is intended for all Americans interested in issues of economic policy, especially the budget deficit and the Clinton versus Congress debates. No specialized training in economics is needed. "A wonderfully accessible discussion of contemporary American economic policy. Meeropol demonstrates that the Reagan-era policies of tax cuts and shredded safety nets, coupled with strident talk of balanced budgets, have been continued and even brought to fruition by the neo-liberal Clinton regime." -- Frances Fox Piven, Graduate School, City University of New York Michael Meeropol is Chair and Professor of Economics, Western New England College.

Converso Non-Conformism in Early Modern Spain - Kevin Ingram - 2018-12-06

This book examines the effects of Jewish conversions to Christianity in late medieval Spanish society. Ingram focuses on these converts and their descendants (known as conversos) not as Judaizers, but as Christian humanists, mystics and evangelists, who attempt to create a new society based on quietist religious practice, merit, and toleration. His narrative takes the reader on a journey from the late fourteenth-century conversions and the first blood purity laws (designed to marginalize conversos), through the early sixteenth-century Erasmian and radical mystical movements, to a Counter-Reformation environment in which conversos become the advocates for pacifism and concordance. His account ends at the court of Philip IV, where growing intolerance towards Madrid's converso courtiers is subtly attacked by Spain's greatest painter, Diego Velázquez, in his work, Los Borrachos. Finally, Ingram examines the historiography of early modern Spain, in which he argues the converso reform phenomenon continues to be underexplored.

Rhetoric and Pluralism - Frederick J. Antczak - 1995

The first of five groups of essays situates Booth within contemporary controversies and within the life experiences and roles where such controversies matter most for human character. Booth's work as a literary critic shapes the second section, which focuses on what the authors see as Booth's key ethical questions about literature and literary criticism. The third section of essays is concerned with the implications of Booth's writing, particularly in its connection with politics. Booth's influence in fields other than literary studies provides the theme for the fourth section. The final section explores the problematic but promising relation among assent, ethics, and

Carrion Ecology and Management - Pedro P. Olea - 2019-07-22

Carrion, or dead animal matter, is an inherent component of aquatic and terrestrial ecosystems worldwide, and is exploited by a wide diversity of organisms from different trophic levels, including microbes, arthropods and vertebrates. Further, carrion consumption by scavengers, i.e. scavenging, supports key ecosystem functions and services such as recycling nutrients and energy, disposing of carcasses and regulating disease spread. Yet, unlike dead plant matter, dead animal decomposition

has received little attention in the fields of ecology, wildlife conservation and environmental management, and as a result the management of carrion for maintaining biodiversity and functional ecosystems has been limited. This book addresses the main ecological patterns and processes relating to the generation and consumption of carrion both in terrestrial and aquatic ecosystems. It also discusses a number of conservation concerns and associated management issues, particularly regarding the increasing role of human-mediated carrion in ecosystems. Lastly, the book outlines future research lines in carrion ecology and management, and identifies the major challenges for scavengers and scavenging processes in the Anthropocene.

Bathing Without a Battle - Ann Louise Barrick PhD - 2008-03-10

2008 AIN Book of the Year Winner! Like its popular predecessor, the new edition of Bathing Without a Battle presents an individualized, problem-solving approach to bathing and personal care of individuals with dementia. On the basis of extensive original research and clinical experience, the editors have developed strategies and techniques that work in both institution and home settings. Their approach is also appropriate for caregiving activities other than bathing, such as morning and evening care, and for frail elders not suffering from dementia. For this second edition, the authors have included historical material on bathing and substantially updated the section on special concerns, including: Pain Skin care Determining the appropriate level of assistance Transfers The environment An enhanced final section addresses ways to support caregivers by increasing their understanding of the care recipient's needs and their knowledge of interventions to improve care and comfort. It also emphasizes self-care and system-level changes to promote person-directed care. Several chapters include specific insights and wisdom from direct caregivers.

Alienated Wisdom - Giuseppe Veltri - 2018-08-21

The present study addresses problems of an epistemological nature which hinge on the question of how to define Jewish thought. It will take its start in an ancient question, that of the relationship between Jewish culture, Greek philosophy, and then Greco-Roman (and Christian) thought in connection with the query into the history and genealogy of wisdom and knowledge. Our journey into the history of the denomination 'Jewish philosophy' will include a leg that will lead us to certain declarations of political, moral, and scientific principles, and then on to the birth of what is called philosophia perennis or, in Christian circles, prisca theologia. Our subject of inquiry will thus be the birth of the concept of Jewish philosophy, Jewish theology and Jewish philosophy of religion. A special emphasis will fall on the topic treated in the last part of this study: Jewish scepticism, a theme that involves a philosophical attitude founded on dialectical "enquiry", as the etymology of the Greek word skepsis properly means.

The Nile River Basin - Seleshi Bekele Awulachew - 2012

The Nile provides freshwater not only for domestic and industrial use, but also for irrigated agriculture, hydropower dams and the vast fisheries resource of the lakes of Central Africa. The Nile River Basin covers the whole Nile Basin and is based on the results of three major research projects supported by the Challenge Program on Water and Food (CPWF). It provides unique and up-to-date insights on agriculture, water resources, governance, poverty, productivity, upstream-downstream linkages, innovations, future plans and their implications. Specifically, the book elaborates the history and the major current and future challenges and opportunities of the Nile river basin. It analyzes the basin characteristics using statistical data and modern tools such as remote sensing and geographic information systems. Population distribution, poverty and vulnerability linked to production system and water access are assessed at the international basin scale, and the hydrology of the region is also analysed. This text provides in-depth scientific model adaptation results for hydrology, sediments, benefit sharing, and payment for environmental services based on detailed scientific and experimental work of the Blue Nile Basin. Production systems as they relate to crops, livestock, fisheries and wetlands are analyzed for the whole Blue and White Nile basin including their constraints. Policy, institutional and technological interventions that increase productivity of agriculture and use of water are also assessed. Water demand modeling, scenario analysis, and tradeoffs that inform future plans and opportunities are included to provide a unique, comprehensive coverage of the subject.

The Big Three in Economics: Adam Smith, Karl Marx, and John Maynard Keynes - Mark Skousen - 2015-01-28

History comes alive in this fascinating story of opposing views that continue to play a fundamental role in today's politics and economics. "The Big Three in Economics" traces the turbulent lives and battle of ideas of the three most influential economists in world history: Adam Smith, representing laissez faire; Karl Marx, reflecting the radical socialist model; and John Maynard Keynes, symbolizing big government and the welfare state. Each view has had a significant influence on shaping the modern world, and the book traces the development of each philosophy through the eyes of its creator. In the twenty-first century, Adam Smith's "invisible hand" model has gained the upper hand, and capitalism appears to have won the battle of ideas over socialism and interventionism. But author Mark Skousen shows that, even in the era of globalization and privatization, Keynesian and Marxian ideas continue to play a significant role in economic policy.

Procedures and Patient Care for the Physical Therapist Assistant - Jennifer Memolo - 2019 Procedures and patient care will be one of the first courses a physical therapist assistant (PTA) student will encounter as they begin their educational career. The

foundational material covered in Procedures and Patient Care for the Physical Therapist Assistant includes information about transfers, positioning, vital sign measurement, wheelchair fit and management, assistive devices, and gait. These skills are vital to know as a PTA, regardless of specialization or location of employment. Inside Procedures and Patient Care for the Physical Therapist Assistant, Jennifer Memolo includes objectives, key terms, common abbreviations, and review questions. Also, in each chapter is information adhering to the current best practice and an understanding of red flags a PTA should know and report to supervising physical therapists or other health care providers. This text stands out from others because it is catered specifically to PTA students rather than the generalized health care practitioner. It can be used throughout the student's education as a reference since all other courses build upon and cycle back to this core information. It can also be utilized even after graduation as preparatory material for the board examination or as a refresher for the practicing clinician. Instructors in educational settings can visit www.efacultylounge.com for additional material to be used for teaching in the classroom. Procedures and Patient Care for the Physical Therapist Assistant provides core information that the PTA will use and build upon throughout their entire career which is what makes it a suitable text for students, faculty, and clinicians.

Safe Patient Handling - Audrey Nelson - 2007

Nursing personnel are consistently listed as one of the top ten occupations for work-related musculoskeletal disorders, with incidence rates of 8.8 per 100 in hospital settings and 13.5 per 100 in nursing home settings. Strategies to prevent or minimize work-related musculoskeletal injuries associated with patient handling are often based on tradition and personal experience rather than scientific evidence. The most common patient handling approaches in the United States include manual patient lifting, classes in body mechanics, training in safe lifting techniques, and back belts.

The Book of Job - Mark Larrimore - 2020-02-25

The life and times of this iconic and enduring biblical book The book of Job raises stark questions about the meaning of innocent suffering and the relationship of the human to the divine, yet it is also one of the Bible's most obscure and paradoxical books. Mark Larrimore provides a panoramic history of this remarkable book, traversing centuries and traditions to examine how Job's trials and his challenge to God have been used and understood in diverse contexts, from commentary and liturgy to philosophy and art. Larrimore traces Job's reception by figures such as Gregory the Great, William Blake, and Elie Wiesel, and reveals how Job has come to be viewed as the Bible's answer to the problem of evil and the perennial question of why a God who supposedly loves justice permits bad things to happen to good people.

Marsilio Ficino and His World - Sophia Howlett - 2016-08-27

This book makes the case for Marsilio Ficino, a Renaissance philosopher and priest, as a canonical thinker, and provides an introduction for a broad audience. Sophia Howlett examines him as part of the milieu of Renaissance Florence, part of a history of Platonic philosophy, and as a key figure in the ongoing crisis between classical revivalism and Christian belief. The author discusses Ficino's vision of a Platonic Christian universe with multiple worlds inhabited by angels, daemons and pagan gods, as well as our own distinctive role within that universe - climbing the heights to talk with angels yet constantly confused by the evidence of our own senses. Ficino as the "new Socrates" suggests to us that by changing ourselves, we can change our world.

The Natural Sciences and the Social Sciences - Robert S. Cohen - 2013-06-29

Natural Sciences and the Social Sciences contains a series of explorations of the different ways in which the social sciences have interacted with the natural sciences. Usually, such interactions are considered to go only 'one way': from the natural to the social sciences. But there are several important essays in this volume which show how developments in the social sciences have affected the natural sciences - even the 'hard' science of physics. Other essays deal with various types of interaction since the Scientific Revolution. In his general introductory chapter, Cohen sets some general themes concerning analogies and homologies and the use of metaphors, drawing specific examples from the use of concepts of physics by marginalist economists and of developments in the life sciences by organismic sociologists. The remaining chapters, which explore the different ways in which the social sciences and the natural sciences have actually interacted, are written by leaders in the field of history of science, drawn from a wide range of countries and disciplines. The book will be of great interest to all historians of science, philosophers interested in questions of methodology, economists and sociologists, and all social scientists concerned with the history of their subject and its foundations.

Ward Layouts with Single Rooms and Space for Flexibility - NHS Estates - 2005-01-01

This report is the result of a three-year programme of research which examines the benefits of single rooms in acute hospital accommodation and establishes the minimum space requirements around the hospital bed. It will underpin the updating of HBN 4, ccurrently in progress. The main issues addressed are: contributing to control of healthcare associated infections; complying with the Disability Discrimination Act 1995; meeting the needs of the Manual Handling Operations Regulations 1992, particularly with regards to lifting patients; meeting the needs of patient privacy and choice. The report seesk affordable solutions encompassing all these issues. It concludes that single rooms provide considerable benefits for patients, clinicians and NHS trusts through helping in infection control, reducing the risk of adverse clinical errors, allowing privacy, and providing flexibility with the potential for increased capacity.

Judaeo-Christian Intellectual Culture in the Seventeenth Century - A.P. Coudert - 2013-03-07

MURIEL MCCARTHY This volume originated from a seminar organised by Richard H. Popkin in Marsh's Library on July 7-8, 1994. It was one of the most stimulating events held in the Library in recent years. Although we have hosted many special seminars on such subjects as rare books, the Huguenots, and Irish church history, this was the first time that a seminar was held which was specifically related to the books in our own collection. It seems surprising that this type of seminar has never been held before although the reason is obvious. Since there is no printed catalogue of the Library scholars are not aware of its contents. In fact the collection of books by late seventeenth and early eighteenth century European authors on, for example, such subjects as biblical criticism, political and religious controversy, is one of the richest parts of the Library's collections. Some years ago we were informed that of the 25,000 books in Marsh's at least 5,000 English books or books printed in England were printed between 1640 and 1700.

The New Encyclopedia of Modern Bodybuilding - Arnold Schwarzenegger - 1998-12-15

Fifteen fantastic years after first publication, Arnold Schwarzenegger is ready to teach and motivate a new generation of athletes with this fully updated and revised New Encyclopedia of Modern Bodybuilding. Inside, Arnold covers all the very latest advances in both training and competition, with new sections on diet and nutrition, the treatment and prevention of injuries, and methods of training, each illustrated with detailed photos featuring bodybuilding's newest stars. Plus, all the features that made this book a classic are still here. You'll find every facet of bodybuilding, from the history of the sport to a complete analysis of the muscles in the body, including Arnold's tips on how to strengthen, sculpt, and define each and every muscle to create the ultimate balanced physique.

Biomaterials and Regenerative Medicine - Peter X. Ma - 2014-07-24

Written by world-leading experts, this book focusses on the role of biomaterials in stem cell research and regenerative medicine. Emphasising basic principles and methodology, it covers stem cell interactions, fabrication technologies, design principles, physical characterisation and biological evaluation, across a broad variety of systems and biomaterials. Topics include: stem cell biology, including embryonic stem cells, IPS, HSC and progenitor cells; modern scaffold structures, including biopolymer, bioceramic, micro- and nanofiber, ECM and biohydrogel; advanced fabrication technologies, including computer-aided tissue engineering and organ printing; cutting-edge drug delivery systems and gene therapy techniques; and medical applications spanning hard and soft tissues, the cardiovascular system and organ regeneration. With a contribution by Nobel laureate Shinya Yamanaka, this is a must-have reference for anyone in the field of biomaterials, stem cell biology and engineering, tissue engineering and regenerative medicine.

The MBR Book - Simon Judd - 2011-04-18

The use of membranes is increasing throughout industry, and particularly the water industry. The municipal water industry, which is concerned with the provision of

clean drinking water to the population, is a big user and developer of membrane technology which helps it to provide water free of pathogens, chemicals, odours and unwanted tastes. Municipal authorities also have to process sewage and waste water, and membranes are used extensively in these processes. The MBR Book covers all important aspects of Membrane BioReactors in water and waste water treatment, from the fundamentals of the processes via design principles to MBR technologies. Industrial case studies help interpret actual results and give pointers for best practice. Useful appendices provide data on commercial membranes and international membrane organisations. * Major growth area in the water industries * Internationally-known author * Principles and practice, backed by case studies

The Making of Modern Economics - Mark Skousen - 2015-01-28

Here is a bold history of economics - the dramatic story of how the great economic thinkers built today's rigorous social science. Noted financial writer and economist Mark Skousen has revised and updated this popular work to provide more material on Adam Smith and Karl Marx, and expanded coverage of Joseph Stiglitz, 'imperfect' markets, and behavioral economics. This comprehensive, yet accessible introduction to the major economic philosophers of the past 225 years begins with Adam Smith and continues through the present day. The text examines the contributions made by each individual to our understanding of the role of the economist, the science of economics, and economic theory. To make the work more engaging, boxes in each chapter highlight little-known - and often amusing - facts about the economists' personal lives that affected their work.

Money, Labour and Land - A G Leventis Senior Research Fellow Clare College A G Leventis Professor of Greek Culture Emeritus Paul Cartledge - 2005-06-29 The cultural wealth of the classical Greek world was matched by its material wealth, and there is abundant textual and archaeological evidence for both. However, radically different theoretical and methodological approaches have been used to interpret this evidence, and conflicts continue to rage as these different starting points produce clashing views on the significance and distribution of money, labour and land. Money, Labour and Land reflects the current explosion in ideas and research by assembling case-studies from an international selection of renowned US, British and European scholars. Drawing on comparative historical and anthropological approaches, sociological, economic and cultural theory, and developments in epigraphy, legal history, numismatics and spatial archaeology, this volume will be of interest to all students and scholars of ancient economies.

New Ideas from Dead Economists - Todd G. Buchholz - 2021-01-26

An entertaining and widely-praised introduction to great economic thinkers throughout history, now in its fourth edition, with updates and commentary on the 2020 "great cessation," Trump and Obama economic policies, the dominance of Amazon, and many other timely topics. Through the teachings of Adam Smith, Thomas Malthus, Karl Marx, John Maynard Keynes, Milton Friedman and more, renowned economist Todd Buchholz shows how age-old ideas still apply to our modern world. In this revised edition, Buchholz offers fascinating insights on the most relevant issues of 2021: climate change, free trade debates, the refugee crisis, growth and conflict in Russia and China, game theory, and behavioral economics. New Ideas from Dead Economists—found on the desks of university students, prime ministers, and Wall Street titans—is a riveting guide to understanding both the evolution of economic theory and our complex contemporary economy.

Traditions Redirecting Contemporary Indonesian Cultural Productions - Jan van der Putten - 2017-08-21

This volume is the result of a conference held in October 2015 in connection with the Frankfurt Book Fair discussing developments that are considered important in contemporary Indonesian cultural productions. The first part of the book reflects on the traumatic experiences of the Indonesian nation caused by a failed coup on October 1, 1965. In more general theoretical terms, this topic connects to the field of memory studies, which, in recent decades, has made an academic comeback. The focus of the chapters in this section is how certain, often distressing, events are represented in narratives in a variety of media that are periodically renewed, changed, rehearsed, repeated, and performed, in order to become or stay part of the collective memory of a certain group of people. The second part of the book explores how forces of globalisation have impacted upon the local and, linguistically surprisingly, rather homogeneous cultural productions of Indonesia. The main strands of inquiry in this second section are topics of global trends in religion, responses to urban development, the impact of popular literary developments, and how traditions are revisited in order to come to terms with international cultural developments.

The Bourgeois Virtues - Deirdre N. McCloskey - 2010-03-15

For a century and a half, the artists and intellectuals of Europe have scorned the bourgeoisie. And for a millennium and a half, the philosophers and theologians of Europe have scorned the marketplace. The bourgeois life, capitalism, Mencken's "booboisie" and David Brooks's "bobos"—all have been, and still are, framed as being responsible for everything from financial to moral poverty, world wars, and spiritual desuetude. Countering these centuries of assumptions and unexamined thinking is Deirdre McCloskey's The Bourgeois Virtues, a magnum opus that offers a radical view: capitalism is good for us. McCloskey's sweeping, charming, and even humorous survey of ethical thought and economic realities—from Plato to Barbara Ehrenreich—overturns every assumption we have about being bourgeois. Can you be virtuous and bourgeois? Do markets improve ethics? Has capitalism made us better as well as richer? Yes, yes, and yes, argues McCloskey, who takes on centuries of capitalism's critics with her erudition and sheer scope of knowledge. Applying a new tradition of "virtue ethics" to our lives in modern economies, she affirms American capitalism without ignoring its faults and celebrates the bourgeois lives we actually live, without supposing that they must be lives without ethical foundations. High Noon, Kant, Bill Murray, the modern novel, van Gogh, and of course economics and the economy all come into play in a book that can only be described as a monumental project and a life's work. The Bourgeois Virtues is nothing less than a dazzling reinterpretation of Western intellectual history, a dead-serious reply to the critics of capitalism—and a surprising page-turner.

Musically Sublime - Kiene Brillenburg Wurth - 2009

instrumental music." "Critically assessing Edmund Burke, James Usher, E.T. A. Hoffmann, Novalis, Friedrich Holderlin, Arthur Schopenhauer, Richard Wagner, and Friedrich Nietzsche, this book re-presents the sublime as a feeling that defers resolution and hangs suspended between pain and pleasure. Musically Sublime rewrites the mathematical sublime as difference, while it redresses the dynamical sublime as trauma; unending, undetermined, unresolved." "Whereas most musicological studies in this area have focused on traces of the Kantian sublime in Handel, Haydn, and Beethoven, this book calls on the nineteenthcentury theorist Arthur Seidl to analyze the sublime of, rather than in, music. It does so by invoking Seidl's concept of formwidrigkeit ("form-contrariness") in juxtaposition with Romantic piano music, (post)modernist musical minimalisms, and Lyotard's postmodern sublime. It presents a sublime of matter; rather than form - performative rather than representational. In doing so, --
